Logan Jaeger
650-556-4570 | loganjaeger@gmail.com | ljaeg.github.io

Education

Columbia University New York, NY
M.A., Statistics — Columbia Statistics Merit Scholarship 2026—Present

University of California, Berkeley Berkeley, CA
B.A., Physics — GPA 3.81; Graduated with Distinction 2017—2021

Work Experience

HRL Laboratories Malibu, CA
Data Scientist / Quantum Device Engineer Nov 2021—Apr 2026

- Built physics-based mathematical models to understand device failure mechanisms
- Analyzed qubit yield across quantum dot devices to identify effective electrical tests and fabrication processes
- Developed software to monitor fabrication health, identify problematic processes, and improve quantum device design
- Designed and maintained SQL databases of electrical test data

Space Sciences Laboratory Berkeley, CA
Research Assistant Mar 2019—Jul 2021

- Created multidimensional convolutional neural networks able to identify signatures of interplanetary dust collected by the NASA Stardust mission
- Published a lead-author paper detailing the novel application of deep learning algorithms for the automation of data collection from the NASA Stardust mission

Publications

1. **Jaeger, L.**, *contributing author*, in Members of the HRL Quantum Team and Collaborators. "A Digitally Controlled Silicon Quantum Processing Unit." *Nature* 655, 1154–1159 (2026)
2. **Jaeger, L.**, et al. “Automatic detection of impact craters on Al foils from the Stardust interstellar dust collector using convolutional neural networks” *Meteoritics and Planetary Science* (2021)

Skills

Programming: Python (NumPy, pandas, TensorFlow, Seaborn), SQL, Linux, Git, scikit-learn

Statistics and Machine Learning: Neural Networks, Bayesian Inference, Regression

Mathematics: Linear Algebra, Probability Theory, Optimization

Interests

Surfing, Baseball, Chess, Early Modern History
